

REVOLUTIONARY SUPPLEMENT TO SPEED UP
THE NATURAL HEALING PROCESS OF JOINTS,
LIGAMENTS AND BONES.

ARTI REPAIR

Backed by science, proven results.

Two innovative sources of native collagen:

- 1. Eggshell membrane (ESM) promotes the endogenous production of hyaluronic acid and promotes soft tissue repair.
- 2. UC-II improves joint comfort, mobility and flexibility

- Trusted building blocks from Arti Motion: glucosamin, MSM and denatured collagen

- Supportive nutrients: copper, zinc, manganese, vitamin C and vitamin K3

- Essential oils that provide relief and boost the body's recovery

Cavalor Arti Repair supports the natural healing process of joints and ligaments. For injured horses to speed up the recovery process.

"The vet was really surprised to see her back after 45 days. He had not expected these results. Clinically, Mambo was completely back ok. Also, the ultrasound showed abnormal improvement. The tendon had recovered much better than he had expected. We are both very satisfied with the result of Arti Repair and can start riding again."

Ellen Roets
Dressage rider

"After a very serious stress fracture of the fetlock joint it seemed impossible to ever ride my favourite stallion again. We gave him all the time needed to recover and supported him nutritionally with Arti Repair. We are ready to compete again now!"

Jeroen de Winter
Showjumper

INJURIES ALWAYS COME UNPLANNED

LET FOOD BE THE MEDICINE.
DISCOVER OUR ARTI-RANGE.

INTENSITY OF WORKLOAD

Not every horse needs the same level of protection. As the intensity of an effort increases, the strain on tendons and joints also grows. Pick the supplement that fits your horses needs and intensity of workload.

LOW

- Building blocks: glucosamin, chondroitin, collagen, MSM, vitamin C, copper, zinc and manganese
- Contains all building blocks for the support of joints and tendons

ARTI MOTION

Cavalor Arti Motion helps maintain strong bones and supple joints. Support rebuilding of synovia. For non-working horses, horses in light training and horses in growth phase.

- Like **Arti Motion** with added whey protein, algea, anti-inflammatory herbs and anti-oxidants
- For daily support of sporthorses, combination of supportive ingredients and anti-inflammatory herbs

ARTI MATRIX

Cavalor Arti Matrix gives optimal support to maintain healthy joints and tendons and protect against overload. Ideal for sporthorses, use during training and post competition.

DID YOUR HORSE GOT INJURED?

Check how to speed up the natural healing process.

HIGH

- Like **Arti Matrix** higher in anti-inflammatory ingredients, formulated for the special needs of high performance horses
- Protection and support of joints and tendons during peak moments

ARTITEC

Cavalor ArtiTec is the result of a 7 year research program. It provides proven protection of joints and tendons, helps migrate negative processes caused by excessive strain. For high performance horses during competition and heavy training.
