events

Healing &
regeneration of
bone, joint,
tendon injuries

WHAT TO CHOOSE WHEN?

ARTI REPAIR

Target: Supports the natural healing of joints, tendons and ligaments after injury

Formule: Native type I & II collagen, essential oils, building blocks (Glucosamin, MSM, collagen), Vit C, Vit K, Ca, Cu, Zn, Mn

Research: Literature review, field trial

For inactive horses due to injury

ARTI MOTION

Target: Contains all building blocks to support healthy joints & tendons

Formule: Building blocks (Glucosamin, chondroitin, collagen, MSM), Vit C, Cu, Zn, Mn

Research: literature review

For recreational horses, horses with growing pain or older horses with arthrosis

ARTI MATRIX

Target: Daily support & protection against inflammation

Formule: Arti Motion + whey protein + algae + anti inflammatory herbs + antioxidants

Research: internal study

For sporthorses or horses with a history of injuries

ARTITEC

Target: Protection against inflammation & prevention of overload

Formule: Higher in anti inflammatory herbs, lower in building blocks

Research: internal study, published research, field trial

For high performance horses during peak moments

FREEBUTE

Target: Provide relief and avoid stiffness after heavy efforts

Formule: Anti inflammatory herbs

Research: internal study

For high performance horses or sensitive horses
